# RED SEA

# OUR PLANET IN THE MIDDLE OF THE UNIVERSE AT NIGHT

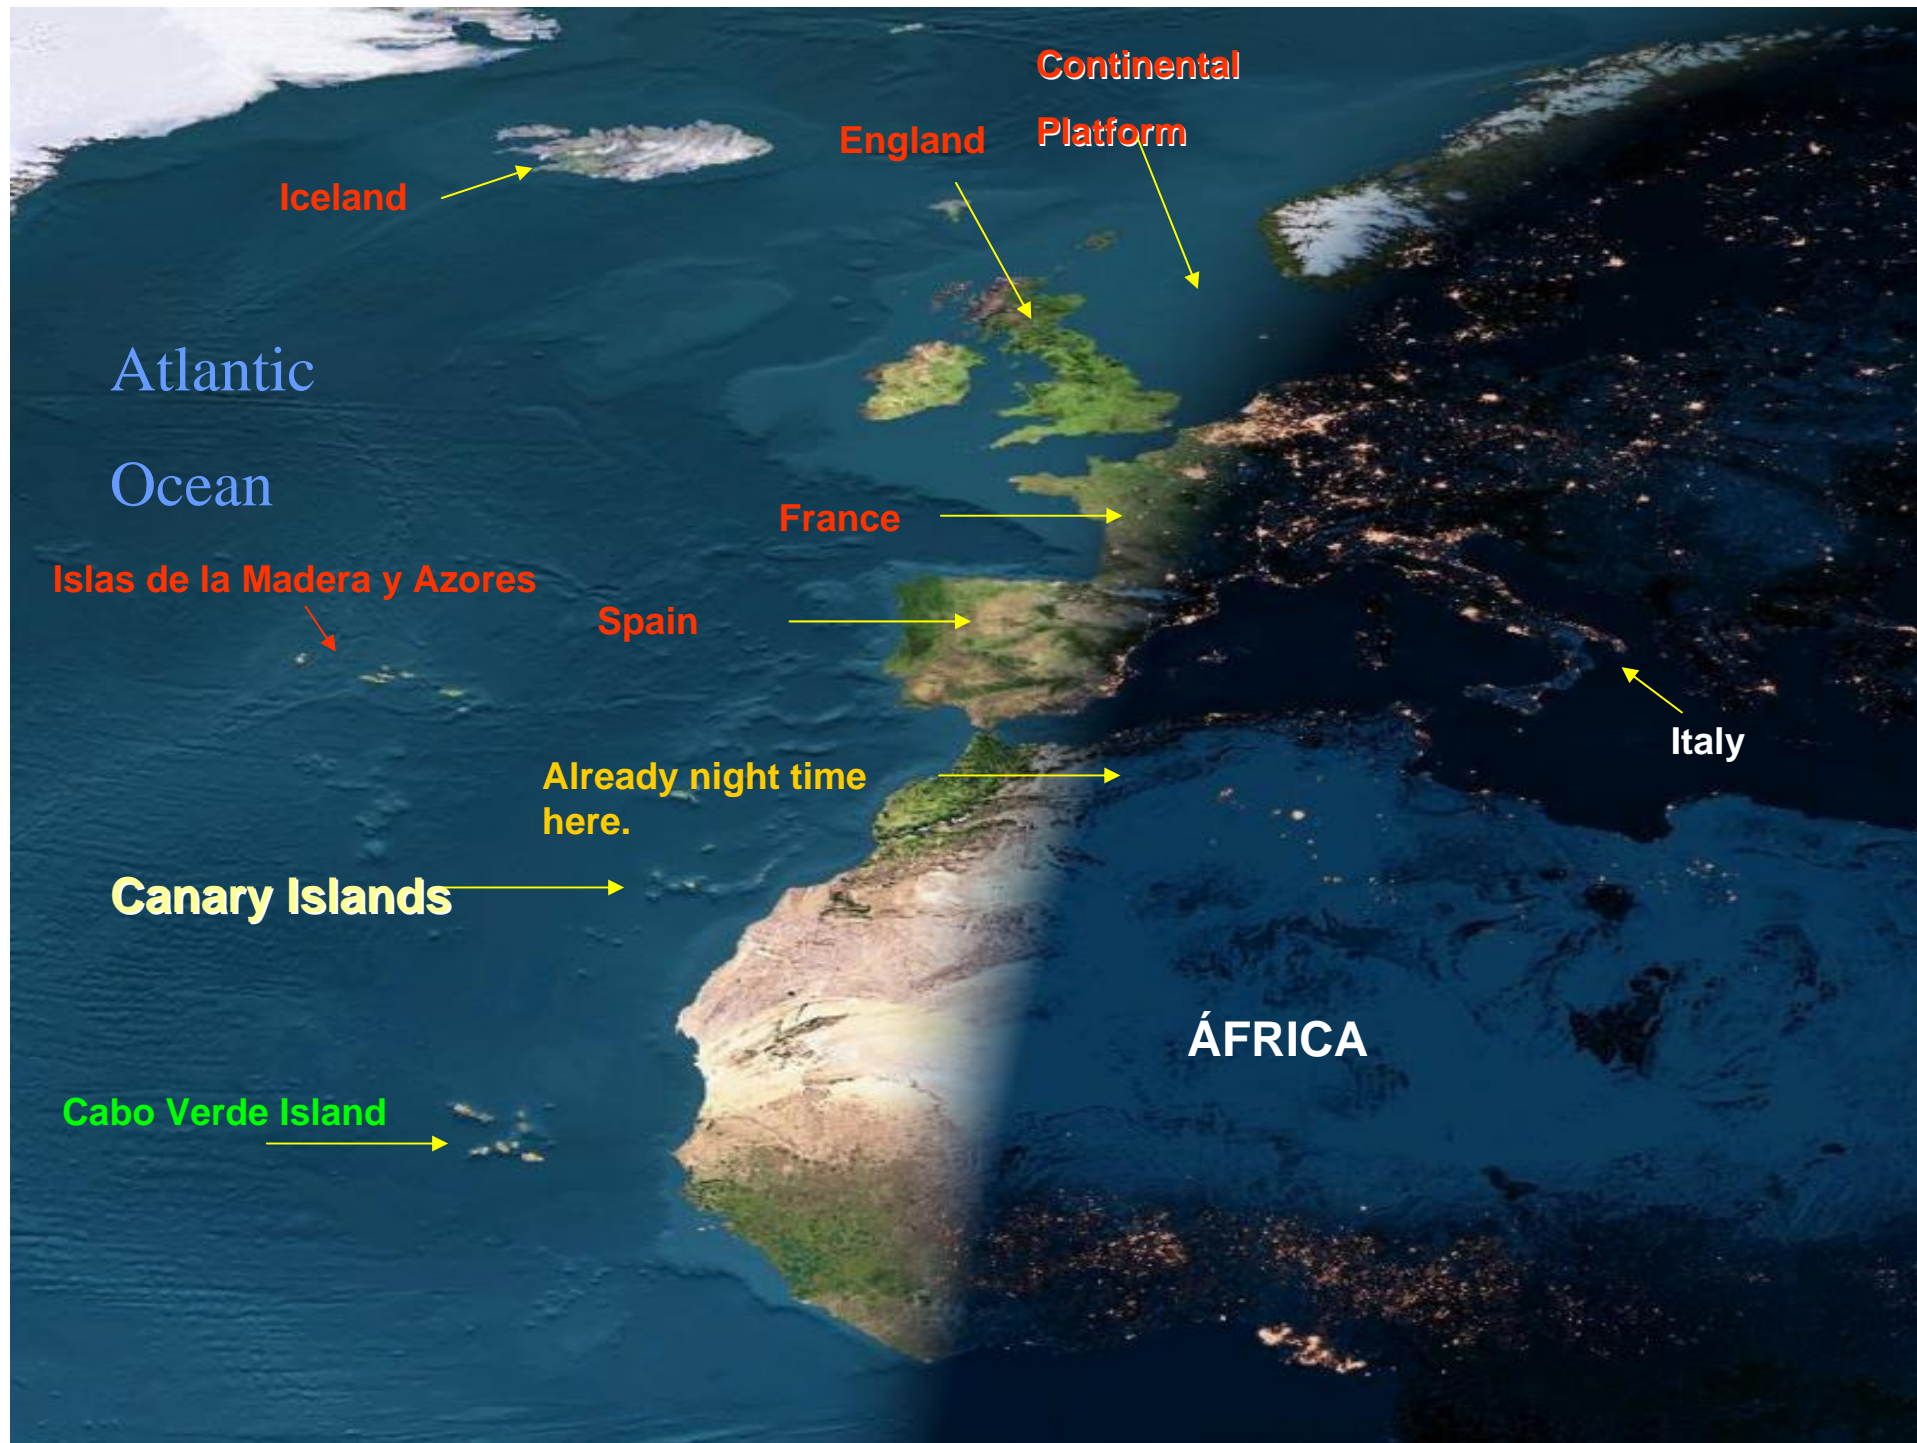

# **SPECTACULAR!**

**Satellite photo of Europe and Africa at night on a cloudless day.**

**Lights are already on in Paris, Barcelona but not in London, Lisbon or Madrid, where there is still daylight.**

**You can see the Azores in the middle of the ocean. A little below Madeira and further Canary Islands and Cape Verde.**

**You can observe the continent platforms from the British Isles to Canada and Iceland in the middle.**

Iceland

England

Continental Platform

Atlantic Ocean

France

Islas de la Madera y Azores

Spain

Italy

Already night time here.

Canary Islands

ÁFRICA

Cabo Verde Island

# NIGHTFALL IN BRAZIL

Goiânia

Uberlândia

Fortaleza

Recife

Salvador

Belo Horizonte

Rio de Janeiro

Grande São Paulo

Florianópolis

A satellite night view of the United States, showing the continental United States, Alaska, and Hawaii. The landmasses are dark, with numerous bright yellow and white lights representing cities and urban areas. The surrounding oceans are dark blue. The text "NIGHTFALL IN USA" is overlaid in the lower right quadrant of the image.

NIGHTFALL IN  
USA

Still  
daylight in  
California.

Chicago

Dallas

Houston

Miami

Puerto Rico

The biggest concentration of  
lights (from top to bottom)  
are the cities of Boston,  
New York, Philadelphia and  
Washington.

Isn't this magic ?

So our children can enjoy these spectacular views for a long time, please forward this message to as many people as possible.

**THE END**
